AIM

To learn how to use various DCL commands such as GRANT and REVOKE in the Hostel Management System database.

DCL COMMANDS – GRANT, REVOKE

Procedure and Syntax

Data Control Language (DCL) is used to control privileges in a database. GRANT provides privileges to a user and REVOKE takes back privileges from a user.

Syntax

GRANT CREATE TABLE TO username;

GRANT SELECT, INSERT, UPDATE, DELETE
ON HostelDB.Hostel_Student TO username;

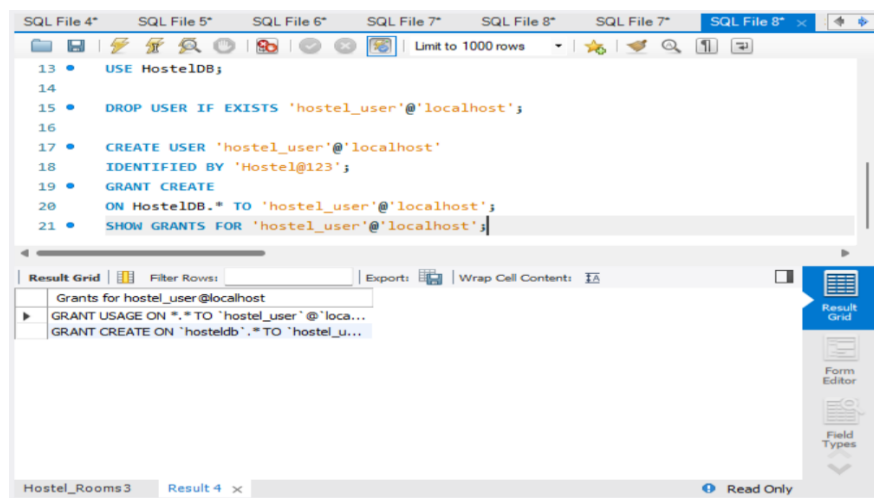

REVOKE CREATE TABLE FROM username;

REVOKE INSERT, UPDATE, DELETE
ON HostelDB.Hostel_Student FROM username;

Questions / Programs

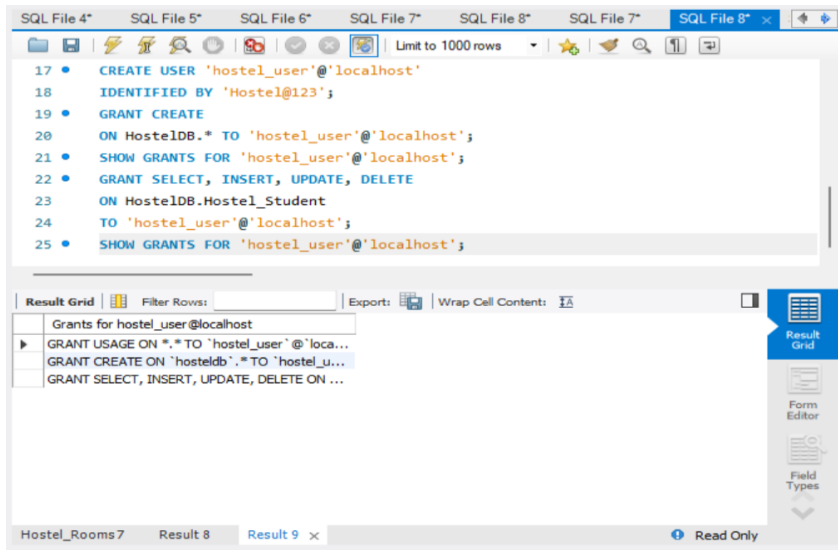

1. Grant permission to create tables to a user.

GRANT CREATE TABLE TO hostel_user;

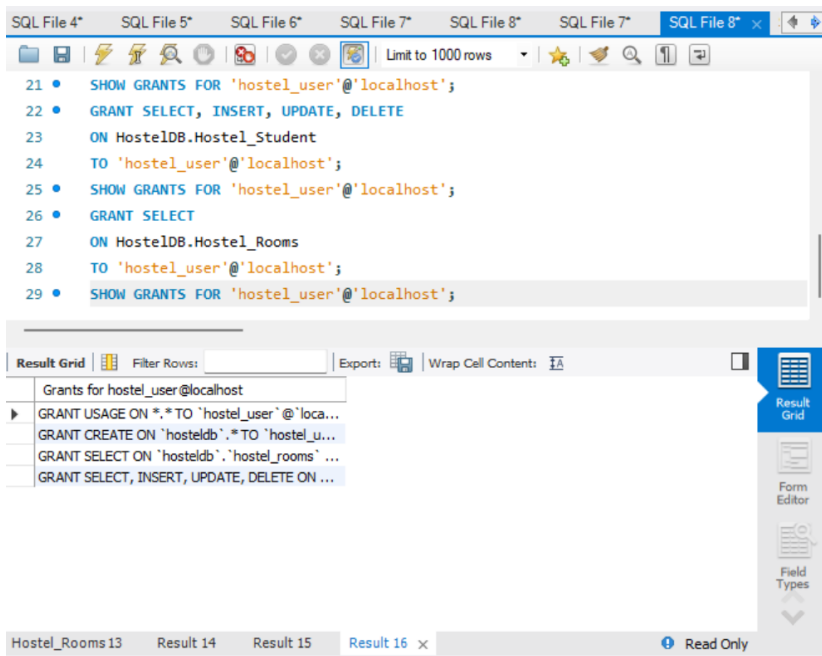

2. Grant SELECT, INSERT, UPDATE and DELETE privileges on Hostel_Student table.

GRANT SELECT, INSERT, UPDATE, DELETE
ON HostelDB.Hostel_Student TO hostel_user;

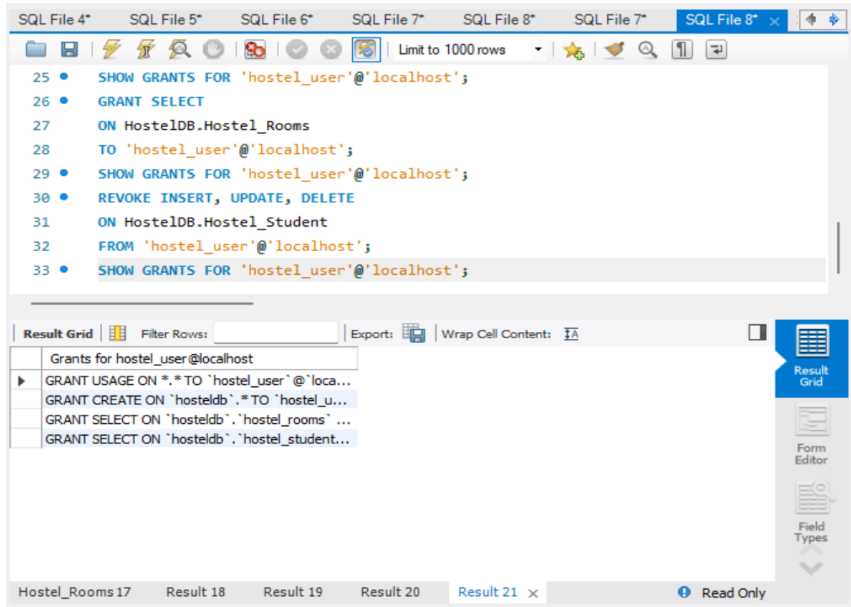

3. Grant SELECT privilege on Hostel_Rooms table.

GRANT SELECT
ON HostelDB.Hostel_Rooms TO hostel_user;

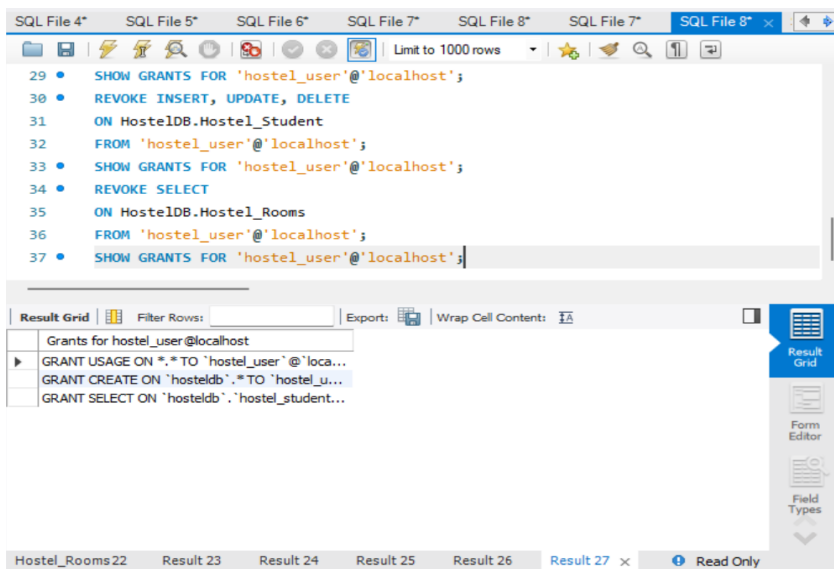

4. Revoke INSERT, UPDATE and DELETE privileges from Hostel_Student table.

REVOKE INSERT, UPDATE, DELETE
ON HostelDB.Hostel_Student FROM hostel_user;

5. Revoke SELECT privilege from Hostel_Rooms table.

REVOKE SELECT
ON HostelDB.Hostel_Rooms FROM hostel_user;

RESULT

Thus, the DCL commands GRANT and REVOKE were successfully executed on the Hostel Management System database.
